(2024 - Present)

EXPERIENCE & PROJECTS

Completed over 20 diverse projects, including frontend web development and backend web development, python projects and web design.

Key Projects:

SaaS Web app: Developed a robust Software-as-a-Service (SaaS) platform, with AI integration, focusing on user scalability, security, and intuitive user interfaces.

E-commerce Website & Management: Designed and implemented a complete e-commerce solution, including product catalogs, secure payment integrations, and a dynamic admin management dashboard.

Chatting and media sharing Web app: Created a real-time chatting application with media sharing capabilities, featuring seamless user authentication and responsive design.

LMS Service Web app: Engineered a Learning Management System (LMS) tailored for educational institutions, offering course management, progress tracking, and interactive features.

Mobile App: Created a custom mobile app for a local business using React Native.

Python projects: Developed innovative Python-based solutions, including data analysis scripts, automation tools, and back-end services for web applications.

Web Design projects: Delivered visually appealing and user-friendly web designs, adhering to modern design principles and responsive design standards.

Freelance Work on Digital Platforms: Offering freelance services on Fiverr and Upwork, trying to deliver high-quality digital solutions to a global client base.
